

NOTES

- * Lots of daffodils under tree - want to keep these and add more interesting bulbs.
- * The fence is ugly - would like some climbing plants.
- * No Roses please!

How to work out the area of your border:

1. Count the number of whole squares in each line (like this).
2. Add them all together.

Scale: 1cm square = 1m

Please mark your dimensions and be sure to include a North point (or indication of sunrise or sunset)
See the checklist for other things to include.
